## THE MARKET BASKET.

A Quiet Week's Trade at the Fruit and Vegetable Stalls.

PEAS LOWER --- TOMATOES HIGHER.

Poultry Scarce and Firm, Fish Supply is Short of Demand.

OFFICE OF PITISBURG DISPATCH. FRIDAY, June 7, 1889.

Reports from fruit and vegetable stalls indigated an unexpectedly quiet trade for the week Home-grown strawberries are scarce, having been kept back by heavy rains and cool weather. Maryland berries were detained beyond the floods, and those which finally did come were in rather bad shape. Tomatoes are scarce and higher. Homegrown peas are in good supply at lower figures than ruled a week ago. Large quantities of Eastern and Southern fruit and vegetables that have been due at this market since Friday last were ordered by shippers to other markets, and the expected glut here has not materialand the expected glut bere has not materialized. Said a leading Liberty street produce commission merchant: "We were notified that trains loaded with stuff were on the way detained by washouts, but so far receipts have been very light, in fact, not sufficient for wants of trade." Reports from dealers in his show supply below demand for the week. Rains and floods have been so general over the country that the full fish supply has been impossible to obtain. Said one of our leading dealers in this line: "We have been able to satisfy our customers, but some kinds of fish we have not

The market for butter, eggs and poultry has improved since last week. Poultry has been in short supply. Florists report unusual quietnoss for the season, and attribute it to the general disposition to ignore parties and fetes in the presence of the appalling calamity which has fallen on the Conemaugh Valley. Magna Charta roses, liles of they valley, De Wattilles and daffodils have been dropped out from the flower list, and moss roses and forget-me-nots have made their first appearance this week.

Following are the latest retail prices of Saturday's market basket materials as furnished by leading dealers:

The course of business in the continental iron markets has been greatly changed by the cola strike extending through all the industries of the country weighs heavily upon trade. Buyers now hold aloof, while sellers show extreme sluctance to enter into fresh engagements. For want of soal a considerable number of hinst furnaces have been damped down, and most of the large finished iron and steel works are on short time. The certainty of a great advance in the cost of fuel, rendering necessary another considerable advance in the prices of iron, is contemplated with dismay. The foreign trade must now continue to diwindle foreign trade must now continue to diwindle away till some similar convulsion takes place in Ragland and Belgium to restore the balance.

## MARKETS BY WIRE.

Wheat Strengthened by Fears of an Adverse Government Report-Corn and Oats Quiet-Hog Products Steady and Lifeless.

CHICAGO-The wheat market to-day precented more animation, and the feeling was rather strong with a steady appreciation in prices most of the session. July opened 1/60 1/60 higher, and advanced with alight changes 1/60 more, ruled strong and closed 1/60 higher than yesterday. The strength was attributed to advices which would indicate that the next FLORISTS EEPORT QUIET TRADE showing than last month. This, together with the rather larger export clearances and re-ported export buying at the seaboard to-day, with indications that the visible supply will show a liberal decrease again, caused prices to

took alarm at the action of the market and bought quite freely, and there was also some investment buying. Around 76c for July a local trader sold rather freely and held the market for awhile, but the demand was active, and all offerings being absorbed, the market passed and held above that figure.

Corn ruled quiet and inactive with the exception of a short time after the opening, trading being limited. The market opened at yesterday's closing prices, fluctuated within 1/42%c, and closed 1/4c higher than yesterday.

Outs were quiet and a shade easier, but later became steady.

CLOSE MARGINS ON CITY REALTY.

The item which appeared in this department of THE DISPATCH yesterday, stating The weather bulletin showed rain in the West and Northwest. Clear and bright weather would be more favorable. Shorts took alarm at the action of the market and bought quite freely and there were the action of the market and the attention of anything and the attention of anything and the action of the market and the attention of anything and the attention of anything and the action of the attention of anything and the attention of anything and the attention of anything and the action of t the attention of capitalists to an unusual degree, and greatly increased their respect for real estate as a safe and profitable investment.

> The signs are good for a boom in the lumber trade. Said a local dealer yesterday: "The lumber business has been dull for some time, with prices tending downward, but I look for a change within the next 20 or 30 days. The loss of lumber by the flood in the Susquehanna Valley was immense. I have seen it computed at \$10,000,000. This is unparalleled. Besides, thousands of houses were destroyed and must be rebuilt. This great loss cannot fail to make a buoyant market and advance prices. This will check, to some extent, building operations in and about Pittsburg, as many will prefer to wait another year rather than go above their

He is delighted with the country, and thinks he will ocate there permanently.

Illinois is fast becoming one of the principal competitors of Pennsylvania in the coal trade. It is reported from Danville, that State, that the Consolidated Coal Company of St. Louis has just opened up the most extensive strip bank west of the anthracite regions, in what is known as the Missionary tract. The field is near the junction of the Salt Fork and Middle Fork of the Vermilion river, and contains 600 acres of land. A horizontal six-foot vein of coal, covered with only 14 feet of lightsoils, extends throughout the entire track. Wallace & Wright, of Lafayette, Ind., have taken the contract of removing this dirt, and have placed three steam shovels at work. The capacity of the plant will be 1,000 tons a day, and with this output, counting 300 working days in a year, it will take 16 years to exhaust the field, it being estimated that there is at least 8,000 tons of coal in an acre of ground.

Real estate has suffered less from the business depression caused by the flood than any other local interest. Reports show there is very little abatement of interest in lands and ouses. A number of deals were consummated yesterday which are noted elsewhere in this department of THE DISPATCH. Twenty-nine mortgages were placed on record aggregating nearly \$75,000. The largest was for \$10,000, the next largest for \$3,000 and the next for \$7,000. This was all home money. Black & Baird placed one of \$15,000 on Penn avenue at 5 per cent for three years, being about 55 per cent of the assessed value of the property. This is a close margin and shows great confidence in the stability of values. Kelly & Rogers placed a mortgage on East End property at 6 per cent.

The dispensing of soda water is carried on to The dispensing of some rate it is one of the principal industries incident to the summer season. The outlay is small and the profits

PICKING UP.

Local Money Matters Recovering, But Im provement Will be Slow. Local financiers who were spoken to yester-day reported that business was picking up a little, but was still below the average. The mail service was better and a big batch of checks arrived from the East. Improvement will be slow, as hundreds who lost relatives or friends at Johnstown will not soon be in condition to engage with alacrity in ordinary purants. Under all the circumstances, the Clearing House report was a good one, the exchanges footing up \$1,550,78 38 and the balances \$20,694 14 showing that there is considerable going on.

MOVEMENTS IN OIL.

omething Must be Done to Stimulate Business-Call for a Conference.

The oil market yesterday was the best of the week in point of activity, if not of strength. It opened at 82%, at which 1,000 harrels were sold. Liberal trading soon put the price up to 82%. A weaker feeling then set in, and the price hung between 82% and 83 the rest of the day, closing at 82%. The ticker service was in good order. Trading was spaamodic and limited, the mest of it being done in the afternoon. "The market will change one way or the other out of a job almost six months ago, went to
Houston, Tex., and worked in the only iron mill
there. He returned to this city a few days ago
in consequence of the mill closing for repairs.
He will return to Houston as soon as he can

"The market will change one way or the other
in the next few weeks," remarked an experienced broker. "Trade is so dull that we must
have a new deal of some kind or quit the business. I look for lower prices." The clearings

ness. I look for lower prices." The clearings were 785,000 barrels.

The conferences of oil exchanges will meet at Bradford on Wednesday, June 12 to adopt measures looking to a reorganization of the conference upon the basis of actual business done by each exchange as shown by its daily clearings, to receive and act upon suggestions looking to a broadening of the trade in oil, and to consider and act upon the revision of the rules. The animus of this movement, it was suggested, was probably to get the scheme for trading in futures again before the exchanges in some shape as to remove objections and insure its passage.

THE BACK TRACK Adverse Influences Depress the Stock Market-Nearly Everything Strong at the Opening but Lower at the Close-Bonds Feverish.

New York, June 7.—The stock market was somewhat less active to-day, but the strong tone of yesterday was continued only in the forenoon, when the adverse influences prevailing became most powerful in the course of prices and the upward movement was checked, and the stocks of the regular list outside of the Grangers. Pacific stocks and New England were dull and without much feature. Realizations again became heavy. The annual report of the Northwestern was swallowed up in the bearish feeling caused by the great fire at Seattle and heavy engagements of gold for export by 'o-morrow's steamers. There was marked strongth in Wheeling and Lake Erie. New England. Unson Pacific and Oregon Short Line at the opening, but the trusts were rather heavy to weak on the decision of the Missouri State Secretary that the new law against trusts would be rigidly enforced.

The Pacific stocks and Short Line were helped by the prespects of an annicable settlement of the Oregon Navigation lease and other matters between the Union and Northern Pacifics. The selling began immediately, however, and belore the end of the first hour prices were on the back track and most of the list were brought below their opening figures, and Tennessee Coal, both common and preferred, with Oregon Short Line, were the only ones which retained any fair proportion of their advances. There was a spurt in Lake Shore after 12 octock, but this was the only apward movement during the afternoon and it failed to have any effect upon the rest of the list. The pressure against the trusts, however, became more pronounced after that time, and load retired 2 per cent. The Grangers followed, and St. Paul was specially weak, but the low prices reached brought in some buying from the shorts and investors, and there was a better tone to the list toward the close, which was quiet and fairly steady generally at slight fractions better than the cover, which was quiet and fairly steady generally at slight fractions better than the lowest of the day. The great majority of the active stocks to-night are fractionally lower. Atchison and St. Paul are each down I per cent, but the declines at the close are quiet numerous, The sales of the day reached fl. Ediloud bonds were also less active, and, like shares, were somewhat leverish and

The outlay is small and the profits large. Two or three of the most popular establishments average about 500 glasses a day. Surgeon General Hammond, however, would see wips it out of existence. He says neither social nor ick water should be drank at all, as the consequences are almost invariably bad. No liquid with a temperature below 50° Farenheit, he insists, ought to be taken into the mouth. As the thirty season is here these words of caution should be borne in mind, coming as they do from one of the most eminent physicians in the world. But however wise and timely this advice may be, it is not likely that it will lessen either the supply or the demand. Allegheny river water is a permanent obstacle to reform in this direction.

the Troubled Island. SYDNEY, N. S. W., June 7 .- The steamer Lubeck has arrived here from Apia, Samoa, with advices to May 28. Everything was quiet in Samon. A truce was maintained between the contending natives, owing to reports that additional German men-of-war were on their way to Apia. Mataafa had were on their way to Apia. Mataaia had collected his men, and it was thought 3,000 of his men would be assembled in one camp shortly. Tamasese is also in camp.

All men-of-war have left Apia. The British man-of-war Rapid had sailed for the Fiji islands. The American steamer Nipsic, convoyed by the steamer Alert, had gone to Tutuila for coal, and from there they were to proceed for Anckland.

OFFICE OF PITTSBURG DISPATCH, | FRIDAY, June 7, 1888. Country Produce-Jobbing Prices.

Country Produce—Jobbing Prices.

There is good demand for reliable eggs at 15c. The Elgin Butter Board made no changes this week. The movement here is active. The time is here for the heaviest sales and lowest prices of cheese. Demand is active the past few days, and Johnstown has absorbed a large portion of the surplus. The blockade of Southern and Eastern trains bearing fruit and vegetables has only been partially broken, and stuff crit and Eastern trains bearing trut and vege-tables has only been partially broken, and stuff failed to come in in the quantities expected. Shippers evidently ordered much of the stuff that was on the way back to Eastern markets. Strawberries are in fair supply, but not in very good shape, having been compelled to await the

JOHNSTOWN'S HORROR will be described and illustrated by staff corresponents and artists in to-morrow's DISPATCH.

I am satisfied that Cancer is hereditary in my family. My father died of it, a sister of my mother died of it, and my own sister died of it. My feelings may be imagined, then, when the horrible disease made its appearance on my side. It was a maliguant Cancer, eating inwardly in such a way that it could not be cut out. Numerous remedies were used for it, but the Cancer grew steadily worse, until itseemed that I was doomed to follow the others of the family. I took Swift's Specific, which, from the first day, forced out the poison and continued its use until I had taken several bottles, when I found myself well. I know that S.S. S. cured me.
